[Verse 1]
Am
                       G
  I'm throwing out the page I found
                   Em F
                             Em F G
  The memory about you and I
Am
  There's a time I dreamed about
                          Em
                                           F
  The place we'll go on a summer night
[Pre-chorus]
   G
              Αm
So take me to your deepest heart
                  Am
Now I really need proof to go on
Cause my life goes dark
       G
When I know that I can never be your love
[Chorus]
              C
Wish we never talked
Wish we never saw
                      Am
But now I know you're just too far
                  F
To catch you with my arms
Wish I never met you
Wish I never touched your hand
On the day I really thought
You are the only one
that I could ever really love

[Verse 2]
                   G
Αm
  I'm not a person that believed
                               F
                        Εm
                                    Em F G
  About the things that people talk
Am
  But the things you said
  they made my world
                  Εm
                        F
                                Εm
  I never doubted you were wrong
[Pre-chorus]
              Am
So take me to your deepest heart
                  Αm
Now I really need proof to go on
Cause my life goes dark
                                Εm
When I know that I can never be your love
[Chorus]
Wish we never talked
I wish we never saw
                      Αm
But now I know you're just too far
To catch you with my arms
I wish I never met you
I wish I never touched your hand
On the day I really thought
You are the only one
that I could ever really love
